

COMING SOON.... Well Water Testing Program

When is the last time you had your well water tested? If it has been over a year, you have waited too long! In October, Town of Troy residents will have the opportunity to test their well water through a program coordinated by the Town of Troy, UW-Extension and Sauk County. The goal of the program is to make it convenient for residents to learn about their drinking water quality and possible remedies if an issue is detected.

In September, residents will receive a flyer in the mail describing the three drinking water testing packages and their purchase prices. If you choose to participate, you can purchase the testing bottles at the Troy Town Hall on October 1st or 2nd. You will pick up your test results and learn more about protecting your drinking water at an educational program at the Riverside Resort in Spring Green on Monday, November 8th from 6-7:30PM.

If you have questions about this program, contact Justine Bula at (608) 355-4842, Jenny Erickson at (608) 355-3250, or visit <https://sauk.extension.wisc.edu/sauk-county-drinking-water-program/>.
